Volume 32

FRIDAY SEPTEMBER 7th 1934

NUMBER 23

Province of Alberta Weekly Crop Report

Issued by the Department of Ag-
riculture, Edmonton, Sept-
ember 1st, 1934

Harvesting of Alberta's crop has been pushed rapidly towards conclusion during the past two weeks under ideal weather conditions which have prevailed over the entire province with the exception of a brief cool, wet spell on August 30 which was general. Cutting is fairly well completed in most of the central and southern districts and is well advanced in the northern sections.

While a conclusive estimate of the 1934 wheat crop will not be possible for some time yet, there is sufficient information in the hands of the department to establish fairly definitely that the average wheat yield over the seeded area of the province will be considerably below average for the past ten years, namely, 17 bushels per acre.

The estimate of the area seeded to wheat in Alberta this year is placed by the Dominion Bureau of Statistics at 7,501,000 acres, compared with 7,898,000 acres in 1933, and 8,201,000 acres in 1932.

A number of factors combined during the season to reduce what gave early promise of being a large crop of wheat and other grains.

In southern, south-eastern & eastern districts drought and grasshoppers were strong deteriorating factors. In the southern districts, however, on the whole, a fairly large volume of wheat has been produced. The best crops are being found in the areas along the international border, from Cardston to Lethbridge and through Medicine Hat, south of the C.P.R. Crow line. Some surprisingly heavy individual yields are being reported from this territory. Along the western side of the province north to Calgary there are also some very good crops. The total volume of wheat on the Lethbridge division of the C.P.R. which extends from Dunsen on the east to Crow's Nest on the west and north to Okotoks, will be fairly substantial and of generally high quality.

In the south-eastern district, east of Drumheller, north of the South Saskatchewan river and south from Stettler and Coronation crops generally have again been largely a failure and the total yield of all grains will be very low.

In the central area of the province, from Ponoka south to Olds, and from the mountains east to the Saskatchewan boundary, an unusually dry season has been experienced. Crops of all kinds have failed to fill to the extent first anticipated and the total yield of wheat and other grains will be below normal in this territory, which is usually productive of good crops. There is also a shortage of feed in many localities in this area.

In the north-central area which centers upon Edmonton in which heavy yields of all grains have been anticipated, a frost, registered on the night of August 22, did damage to uncut and unripe crops. The area affected was from Athabasca on the north to below Red Deer on the south and from some miles west of the C. and E. line to eastern boundary of the province, and the frost varied in intensity from five to ten degrees. On the night of August 30 a further frost was registered in the area from Edmonton east and north-east, but of lighter degree. While it is impossible accurately to estimate the extent of damage to wheat crops until threshing is under way, the general indication at present is that there was a large area of wheat which will suffer in quality to

the extent of one to two grades. South an south-east of Edmonton, a good deal of the wheat was either cut or fully ripe, but individual fields undoubtedly suffered some damage. In the districts just west and north-west of Edmonton, and to the north, north-east and east, as far as the border, the damage appears to have been somewhat greater. Much of the grain in these districts was still uncut, and some of the wheat crops were rather badly frozen, while oats and barley crops have apparently suffered heavily. In addition, potato fields and garden stuff were considerably damaged.

Peace River districts have escaped frost thus far and harvesting is being rushed to conclusion with every prospect that the crop will be one of the best ever taken off in that country.

With respect to coarse grain while the area seeded in the Province this year was larger than that of last year, the total yield is likely to be somewhat less due to drought conditions in the south and the frost in the central areas Oats for seed will be a short crop.

FEED SITUATION

Taking the province as a whole, it is estimated by the Department that there are sufficient supplies of feed in the province to meet requirements. In the south-western district there is a considerable production of long feed this season, the Pincher Creek area having produced a large supply, including a considerable amount of excellent timothy. Good crops of alfalfa hay are being harvested from the irrigated districts throughout the south-eastern, eastern and some of the central districts. There will be a shortage of feed in the north-central and northern districts an abundant supply of feed of all kinds is anticipated. One effect of the recent frost undoubtedly has been to reduce some grain crops to the status of feed.

FREE FREIGHT POLICY

The department is now proceeding to organize the work of relief for drought areas under the free freight policy under which the province, dominion and railways will again share the cost for the movement of settlers to other locations, and arrangements are being made to meet the situation created by the shortage of feed in certain areas.

LIVE STOCK

Live stock generally is in fairly good condition. There is in some sections of the province chiefly the drought areas, a large number of stock of poor quality, for the handling of which policies are now being considered. Prices for cattle have not materially improved this season.

The hog situation shows considerable improvement over last year with respect to quality of hogs being marketed. Up to August 18, hogs marketed through packing plants and stockyards had totalled 559,000 of which 10.91 per cent, had graded sets, compared with 7.28 per cent, in the same period last year. Fall marketings should indicate an even greater improvement. The pig survey conducted jointly by the federal and provincial departments indicates that the marketing for the year will be from 125 to 150 per cent greater than those for 1933.

Are you attending Bank Night at the Capitol every Wednesday?

Shirley King had the misfortune to break an axle in his truck on Wednesday, and he had to lay up while repairs were made. Luckily the break occurred in town here.

Large Enrollment At Raymond School

Raymond's school opened for the fall and winter term Tuesday, Sept. 4th, with one of the heaviest enrollments in the history of the town. At the Public School, there were 573 enrolled, and 531 in attendance, which set a new record, and it is likely that a number more will still enter. 14 teachers have this number, and Principal J. O. Hickman states they will be just as crowded this year, with the new room, as they were last year without it.

It looks as though a substantial addition to the present Public School building, or the erection of a Cottage School to take care of the first four grades or so, will be a necessity in the not distant future. Think it over Ratepayers, it's your question.

There were 120 at the High School on Tuesday, which in the light of past experience, represents slightly over half of what will enroll, so that we may expect nearly 200 there when enrollment is at its peak, making a total of nearly 800 students in Raymond's schools.

Based on the usual 35% or so of the population in school, Raymond now has a population of between 2,000 and 2,200 and still growing.

News Notes

Ruth Chatterton and Geo. Brent in "Female" Capitol Monday.

Mrs. Jack Peterson of Stirling was over to visit her sister Mrs. Don Wall.

Gordon Brewerton was a Raymond visitor from Cardston on Thursday.

Mr. and Mrs. W. W. Redebach and family have moved into the upper floor of the J. E. Earl home for the school year.

Canadian Utilities have recently purchased a new 1/2 ton International runabout truck for their service and repair work in the town. It is a shiny green color and very natty looking.

With our rain storm Thursday night Glenwood reports a heavy rain, and Coutts reports rain and snow. A blanket of white covering the ground Friday morning.

Royalist No. 4, the "wonder well" of Turner Valley, which has produced an estimated flow of 5,000,000 barrels of crude oil to be abandoned by the Imperial and as much as possible of the casing will be pulled. The gas and oil flow is diminishing now until it is unprofitable.

Making a plea for a more equitable distribution of profits from industry, Hon. H. H. Stevens, addressed an interested group of listeners in Lethbridge last Saturday night. He is feeling the pulse of the people in these addresses as few politicians have done in past years.

Mr. and Mrs. Alma Betts returned home Tuesday from a month's vacation trip which included a visit with relatives in Payson, Utah, the old home town of Alma, Butte, Montana, where Mrs. Betts brother lives and many points between. On the way home they went over Logan Pass in Glacier Park, and Alma says the only reason he didn't go to Seattle was because the purse was getting rather flat. They report one of the most enjoyable vacations of their life, and Alma says he doubts if he ever has another such vacation.

News Notes

T. Geo Wood was a Lethbridge visitor on Wednesday last.

Do not miss the double feature program Capitol Friday and Saturday.

This is perfect Indian Summer weather isn't it? Warm days and cool nights.

Mrs. Don Wall was brought home from the hospital this week where she recently underwent an operation.

There will be quite an exodus from here when the B.Y.U. students go back to their studies this fall.

All star cast in "TILLIE and GUS" and Buck Jones in "DEADLINE" Capitol Friday and Saturday. Two fine features.

Glaring headlights put a car in the ditch on the Lethbridge road Wednesday night. Too bad this dangerous practice cannot be stopped.

Miss Zelpha Hancock, daughter of Mr. and Mrs. C. E. Hancock, was the lucky winner of the \$20 prize at the Capitol on Wednesday night last.

Miss Myrtle Johnson, had an attack of ptomaine poisoning on her way here to start school Tuesday, and had to spend a day in Lethbridge under the Doctor's care.

Over 300 villages in China have been destroyed by floods and inhabitants are living in the tops of trees along the rivers. Relief is being organized and sent in as rapidly as possible.

Mrs. Elsie M. Stevens returned home last week from the mineral Springs at Banff, where she has been taking treatment for the past month and is feeling very much improved in health.

Fred Ord, of the New Jersey Machine Co., returned to his home last week, after having been here for several weeks installing five new centrifugals of the very latest type in the Sugar Factory. The inventor of these machines was also here during the summer.

Messrs. A. C. Larson and J. C. L. Lund, brothers of Mrs. Elsie M. Stevenson, and Miss Lillian and Master Gordon Lund, niece and nephew of Mrs. Stevenson, all of Salt Lake City, Utah, were here visiting for a few days, and were greatly impressed with the country and its great fields of grain.

Watch for Anniversary Week at the Capitol. The first week in October. Three outstanding attractions. Geo. Arliss in "The House of Rothschild" Claudette Colbert and Clark Gable in "HAPPENED ONE NIGHT" and Wm. Powell in "THE KET". With a console Radio given away FREE Saturday night Oct. 6th.

It won't be long until the World's Series Baseball games will commence, and then every one's radio will be tuned in to the broadcast of the games. From present appearances the race will be between Bill Terry and his New York Giants, and Mickey Cochrane and his Detroit Tigers. There will be a big plenty of excitement when the conquerors of each league meet in battle.

Beet Digging Will Start September 15th

Local Girls Enjoy Holiday Motor Trip

Mr. Lawrence McNaughton of Cardston and Miss Lenore and Wynora Scoville just returned from a motor trip to Spokane and Moscow Idaho. They were shown thru the University in Moscow by Mr. Wesley Barton who is a Dr. of Science at the University and whose wife is a niece of Mr. and Mrs. James Fisher.

They also visited in Missoula, Montana with Mr. and Mrs. Neil Fisher and family who are doing fine and are well and happy. Mrs. Fisher and Iris have recovered from their accidents, Iris having been injured badly by a car running into her. Neil is enjoying his work and he and his wife drove their guests to the orchards and University buildings in their new Studebaker and the girls reported peaches growing in Neil's back yard. Venona, their baby has become well known as a dancer in the city. Iris and Desta are doing excellent in their music. The family came to the line last week but were refused admittance which was very disappointing.

Mr. McNaughton, Lenora and Wynora enjoyed the scenery over Logan Pass and between Missoula and Spokane.

Parents Attention!

Next Wednesday afternoon is Clean-up Day at the Public School. Let the boys and girls take their rakes, shovels, etc. to clean up the cinders and refuse on the grounds, and you take your team and wagon to help haul some sand to give them something to play in.

We all like lower taxes. Let's help out in this and save the Board expense.

Next Friday, September 14th the School Fair will be held. Encourage the children to exhibit produce of merit, not for the sake of winning prizes altogether, but to make the Fair a success and teach the children to have pride in what they can do.

Mr. and Mrs. Alwyn Stone are moving into the Dean Land home for the winter.

H. A. Christie, our local C.P. R. Agent has purchased a new Ford V8 the deal being made this week with King Motors.

John H. Blackmore, returned last week from several weeks spent in the Cardston district, where he has been holidaying and assisting his brothers in their farm work there.

Alberta will have another deficit of \$1,878,031 dollars for the current fiscal year, whereas a surplus of \$9,700 was anticipated in the yearly budget last session of Parliament.

A very enjoyable conjoint session was reported in both Raymond wards last Sunday evening, under the direction of the Mutual Improvement Association. During the next two weeks Mutual work will commence in both wards the First Ward holding their opening next Tuesday evening in the Opera House.

Mr. and Mrs. Lee Brewerton returned Monday after a rather hurried trip to Salt Lake City, where Lee took his sister Mrs. S. E. Hill, after a visit with relatives here. They left Tuesday of last week, took two days each way on the road, and the other two visiting in Salt Lake. A very pleasant trip is reported.

It won't be long now. The beets are being sampled in the fields, and are beginning to ripen off, and with the heavy harvest expected, orders for digging will go out for the 15th, and digging in Raymond district will likely start about Sept 17th or 18th, and the Factory commence its fall campaign about Sept. 20th, depending upon the supplies of beets in the sheds by that time.

Equipment was tested out last week in some portions of the plant, and the flumes, belts, roller, etc., will be tested out next week, prior to the expected start of the mill. Considerable new equipment has been installed during the spring and summer, and this will all be tested out. With beet digging and the campaign, we can look to another five months of activity in the town and district.

Elders Social Is Held

A social, in honor of Elders Solon E. Low, who is teaching school in Stirling, and H. Dean Rolfsen, who is leaving to study in the B.Y.U. at Provo, was held in the High School Monday evening last, sponsored by the First Ward Elders Quorum of which these two have been active workers. Due to the busy season the crowd was rather slim, and the program was late getting started, but those present had an enjoyable time.

After the opening exercise, the following program was given:

Reading—Mrs. Louis Brandley.

Banjo Solo—Wm. Burrows.

Remarks of appreciation by D. G. Selman, President of the Quorum.

Remarks by Bishop Allen of the First Ward.

Vocal Solo—Miss Velma Nalder.

Reading—Franklin Smith.

Remarks—Dean Rolfsen.

Tap Dance—Misses Redd and Price.

Wilford VanOrman then took charge of the crowd and games were enjoyed for an hour or so.

Through some misunderstanding and press of work, Solon was unable to be in attendance at the social.

Another death from a binder accident occurred at Lacombe, when Dean Watson, 26, was thrown in front of the binder when the horses bolted, and was killed before rescued from the mix-up.

Mayor W. G. Meeks, and several other Raymond people attended the Banquet and meeting in Lethbridge Saturday, when Hon. H. H. Stevens was the guest of honor, and speaker at the largely attended meeting in the Majestic Theatre.

Russ Colombo, victim of an accidental shooting from an antique pistol he was examining, died in Hollywood over the weekend, and radio has lost one of its most popular crooners. His mother is also very ill in hospital.

The Misses Beatrice Carl, Mildred and Margaret Roberts were the delightful hostesses, at the home of Mr. and Mrs. S. R. Carl, Saturday evening Sept. 1 in honor of Miss Vivienne Carl's birthday. The table was beautifully decorated with pink and mauve gladiolas the centre piece being a three tier birthday cake artistically decorated in pink and white, bearing 21 candles. A dainty lunch was served at midnight by the hostesses. An enjoyable time was had by all.

A WORD TO SUBSCRIBERS

Will you be good enough to spare us the expense of collection costs on your subscription account, provided we will give you the benefit of this expense in a reduction on your account. If you will do this drop in and let's have a settlement. As we have pointed out several times before, we will make it worth your while.

It costs us in the neighborhood of 25% to collect, whether you hire someone, or whether you use the mails. By the time you figure up a person's time in mailing out notices, cost of printing these notices, envelopes, stamps, and so on it is nearly as expensive one way as it is the other.

On the basis of our \$2.00 per year subscription rate, we will give you a 50c. reduction, or 25%, on every account that is settled here in the office. As soon as we have started on the outside either by mail or directly, it will be necessary to collect on the basis of the regular price. Please help us.

To make the thing easier for you, we will accept wheat, or any kind of grain at market prices, flour if you are getting a grist, or any other kind of produce we can use, in settlement, and as long as the account is settled in the office \$1.50 will pay a year's account either new or renewal or arrears.

This offer is subject to withdrawal at any time, so we would ask that you act as quickly as possible, and make arrangements for a settlement.

Thank you, we appreciate your support and co-operation.

News Notes

The continental divide west of Denver, Colo. was covered with snow from a Sunday storm and tourists in that part were stopping for snowball fights in the mountain passes on Labor Day.

Dr John T. Ross, Deputy Minister of Education of Alberta, and known to many old timers of Southern Alberta is retiring from his labors, having reached the retirement age. He was closely associated with education in Southern Alberta many years ago.

CAESAR'S WAY DIES HARD

(By E. W. McDiarmid)

IT WAS, 'EITHER OR' TO THE ANCIENT, BUT THE TWENTIETH CENTURY SLOWLY IS LEARNING THE BETTER WAY TO GET AHEAD IS 'TO LIVE AND TO LET LIVE.'

The World War was a culmination of a way of thinking which we may call the "either or" school. It flourished in those days when, as Carlyle has said, the main question was "Canst thou kill me, or can I kill thee?" Rome and Carthage could not both survive, according to stern Cato. Carthage delenda est, he cried. Carthage must be destroyed.

This old philosophy dies hard. It survives in milder form in inter-city rivalry—Minneapolis or St. Paul, Dallas or Fort Worth. A Fort Worth loyal son tells with great gusto, the old story of the Dallas man who dreamed that he died and had gone to heaven. To his first remark, which was to the effect that he had not known that heaven was so much like Dallas, he received the laconic rejoinder, "This is not heaven!" This invariably brings from Dallas some such statement as this: "The difference between us of Dallas and you of Fort Worth is that we know that you are what you think we are."

Much of this sort of thing is good-natured rivalry, but it is reminiscent of a most pernicious attitude which sorely needs to be discarded. It is superficial to think that one city can prosper only at the expense of a neighboring city, and especially to fail to see that the prosperity of that neighboring city involves its rival in good fortune also. Relationships between cities, as between individuals, are so involved that damage to one means damage to the other. If one prospers, the other is bound to share in that prosperity.

"Both and" is better than "either or" as a working principle in human relationship. The latter means strife and war; the former fellowship and peace.

"Both and" works well in relationship between individuals. Why should Croesus in his palace bother about the pauper in the slums? Only that, as Dickens puts it, "there is not an atom of that beggar's slime, not a cubic inch of any pestilential gas in which he lives, not one obscenity or degradation, but shall work its retribution." It is not either Croesus or the beggar but both together for weal or woe.

In science, one must be a good internationalist. It will not do to be ignorant of or oblivious to the contributions to knowledge from other lands. Every

good psychologist knows what other lands have contributed to his science, and is grateful accordingly. Why should it be otherwise among nations? Especially does genuine patriotism require understanding of and appreciation for the contributions to civilization from lands other than one's own.

How the other half lives is of tremendous importance to the half that lives in comfort and ease. The problem of the nomads, young and old, who have practically taken possession of freight trains in their journeyings from pillar to post, is one that concerns every individual who dwells in safety under his own vine and fig tree. The "both and" philosophy is the only one that will work successfully here.

"Alan," said Kant, "cannot get along with his fellows, and he cannot get along without them." To get along with one's neighbors is difficult enough, especially if one neighbor is interested in a vegetable garden and the other raises chickens. Neighbors of different races and color face greater problems.

Failure at this point is due mainly to the fact that no serious effort has been made to get along together. The older way of thinking has been more or less directly opposed to any organized attempt to bind together in a universal fellowship men of different creeds and races. Rotary around the world is exemplifying a newer and better philosophy—that of "both and". At dinner tables in many lands, men of different religions and of no particular religion, of varying creeds, and of political views that are quite incompatible, are meeting in a fellowship of which Caesar did not dream and which would have interested Attila the Hun not at all.

Our devices for classifying humanity have been mischievous. The Greeks called all others barbarians. Christian nations call other nations pagan. Mountaineers refer to outsiders as foreigners. Aliens, outsiders, pagans, foreigners are unlovely terms. Substitute the terms friends, comrades, brothers, and you speak the language of Rotary.—The Rotarian.

EDITORS NOTE: We publish the above article, because we believe its sentiments are worthy of consideration by all of us. We should be solicitous of the welfare of the stranger within our gates, and should consider that his interests are our interests. As Britons, we should remember that we are the product of a fusion of many races stretching back through countless ages, and just as their best has assisted in making the English, what they are today, just so, our neighbors, living amongst us from foreign lands and climes, can

give us lessons in thrift, industry and honesty that will be a benefit to all of us.

Then too, we are in the midst of a struggle for equality and greater freedom for all. To carry on such a warfare, and at the same time treat coldly and with disrespect those of other tongues who live amongst us, must look like hypocrisy of the deepest dye to our fellow men.

At any rate, we commend to our readers this article, and ask that before you pass judgment you consider its points from all angles.

Social credit is not popular everywhere, but leading economists are commencing to think in values in relation to commodities instead of dollars and the gold standard. This is an encouraging sign at any rate.

2. WHY YOU SHOULD START A CLUB

SKEET was originally designed and intended to give a pleasing and informal variety of practice for field shooting by means of clay targets and traps, but owing to its unfettered and consistent popularity, it has gradually developed until now it has become an established sport in itself. Men and women play it regularly who never go into the field, and find it sufficient. Today, there are Skeet leagues and associations and championship shoots, and all this must be on account of a very definite cause. What is it that has made Skeet so popular with all classes and types of people? Why are there already some six hundred clubs in existence, with more constantly being formed?

It is very hard to give any kind of comprehensive answer to so large a question in a short article. The best answer of all is, "Try it for yourself, and then you will see." But until you have a chance of trying your hand at it, here are one or two points to think over.

First, it is quite obvious that every form of sport has some special attraction of its own, and by reason of this holds its following of "fans." But it is also true that many sports are accompanied by handicaps that restrict hundreds of enthusiasts from taking active part. Golf, for instance, and polo, football, handball, squash, etc., call for good muscular development, and so on, down the line. Moreover, almost every existing form of outdoor sport is restricted to a few months each year. Game shooting, for instance, is a matter of a short

season, and then the gun must regrettably be put away until the following year. In the intervening months, time hangs heavily and you get hopelessly out of practice.

Skeet is really unique in that way. It is a year-round game. Novices with the gun need not fear repeating their initial mistakes "at the opening of the season," for they may have daily practice, under field conditions, the whole year long. And the old-timers are provided with shooting practice that is as swift (often more so) and varied as any form of upland game shooting, during the tedious closed seasons.

Secondly, Skeet is a sport for everyone. When you come to consider a list of possible members for your club, you need not be deterred from asking anyone to join by considerations of age, sex, or bank balance (plus or minus). It is a real family game: father and mother—or grandfather and grandmother, for that matter—are no more excluded from its thrills than are the youngsters. And it is inexpensive. Little equipment is required, and may be bought for less than \$100.00, if necessary. The records of the National Skeet Shooting Association recently published some interesting facts. An octogenarian judge repeatedly breaks twenty-four birds in a row out of twenty-five, and a boy of fifteen is the youngest shooter on record to get a straight.

Here is a thrilling, healthy, inexpensive, outdoor sport for the whole year round—and it is grand fun!

This is No. 2 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the vogue across Canada.

UNITED GRAIN GROWERS LIMITED

A DIVIDEND at the rate of four per cent has been declared on the paid-up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1934. Cheques will be mailed on September 15, 1934, to shareholders of record at the close of business, July 31st. By order of the Board of Directors.

BABY SLEEPS

Babies cry because crying is one of the few ways they have of expressing their feelings, or of securing the attention they need. Just how often or for how long a baby will cry will depend upon a number of things.

The new-born baby sleeps most of the time, waking to be fed and then going off to sleep again. As the child grows older, he sleeps less, and if he is to sleep throughout the night, then he must be trained, from birth, in regular habits of sleeping, feeding, elimination and bathing. It is much more simple to establish the proper habit from the first than to have to correct bad habits later on.

The baby will not sleep regularly unless he has other daily habits which are also regular. "Feed by the clock" is good advice which might be extended to bed-time, bathing and elimination. It is helpful to the child's development to have these habits established early so that they become second nature to him, requiring no attention, and leaving him free to develop other activities.

The baby who is upset when feeding time comes is apt to swallow a great deal of air with his food; this may mean that he will not secure sufficient food, and the result is a restless sleep after such a feeding. Holding the child over the shoulder and gently patting his back helps to expel the air from the stomach.

Keeping him warm enough, but not too warm, and turning him so as to give him a change of position, encourage sound sleep. The baby has not the same ability as the adult to adjust the body temperature, hence the importance of providing him with just the right amount of clothing and covers, depending upon the temperature. The baby who is over-clothed is irritable and restless because he is uncomfortable.

Colic gives rise to severe pains, it is due to an irritation of the bowel from some cause. The baby with colic usually lies with his legs drawn up and the pain gives rise to piercing cries. Bowel movement gives relief, and the baby will be willing to take some food.

A cold in the head not only interferes with his suckling, so it is to be expected that his sleep will be restless if he has a cold. Fever is another cause of poor sleep. As previously stated, the control of body temperature is not well established in the baby, and so babies run high temperatures very readily.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

EXPERIMENTAL STATION, LETHBRIDGE

WEEKLY LETTER

A GOOD TIME TO PLANT MANY PERENNIAL FLOWERS

Many of the perennial flowers grown at this Station are best planted in the fall and a few notes on the planting of a few of the leading ones should it be believed, make a timely and interesting topic for this week's letter. No flower garden is complete without perennials and few if any flowers need as little attention when once they are started.

In preparing the soil some growers trench to a depth of 1½ to 2 feet and add well rotted cow manure which is worked into the lower foot or so of trenched soil. Care is taken not to apply any manure where it will be likely to come into direct contact with any of the new plants. A good plan is to first remove six or more inches of the surface soil, replacing it after the bed has been trenched, and manured. In addition to manure, chemical fertilizer is useful. Ammonium phosphate is recommended and it should be applied broadcast at the rate of about 8 ounces to 100 square feet of bed, and worked into the soil by spading. At this station the practice is to apply well rotted manure as a top dressing just before freeze-up. This covering

protects the plants from excessive thawing and freezing, and helps to conserve moisture. In the spring the longer straw of the manure is raked off but the shorter material is forked into the ground near the plants to provide added fertility.

The peony is best planted in the fall where adequate moisture is available and best results are obtained by planting early in September. The varieties are propagated by dividing the roots of the old plants and the divisions are cut so that each will have at least one bud. The plants are set so that the crowns are about two inches below the surface. The plants need plenty of room for full development and need to be set three to four feet apart, and in dry land five feet.

Tulips bulbs are usually set out here in October though late September planting is quite satisfactory. In planting the bulbs are set about 4 inches apart and 4 inches deep. Some of the early flowering varieties of tulips grown here include Proserpine, Vermilion Brilliant, Cottage Maid, Duchess De Parma, Chrysolora and Pink Beauty. Varieties of Darwin tulips grown here include Sunset, Clara Butt, Pride of Haarlem, Gretchen and Barton just to mention a few.

The iris is a very easily grown perennial that deserves a place in every flower garden. In its numerous varieties, are found many shades of colour that add greatly to the charm and beauty of its delicate bloom. The iris is propagated very easily by dividing the roots of an old plant. This is usually done in the fall at this station though spring planting gives very satisfactory results. A few of the fifty or more varieties of iris being planted here this fall include Alcazar, Amas, Delight, Dusky Maid, Isolone, Lohengrin, Ma Mie, Mrs. Allen Greg and Quaker Lady.

There is not space to even mention the many other desirable perennials available to the flower grower who is planning a perennial border though other varieties that deserve consideration, to name only a few, are the Iceland and Oriental Poppies, varieties of Columbine, Coreopsis, Gaillardia and Delphinium. All are easily started from seed or by dividing old plants.

ALBERTA TAXATION INQUIRY BOARD

Public sittings of the Board appointed to make inquiry into the taxation now imposed by the Province and by Municipal and other similar authorities, will be held at central points in the Province on dates to be announced later.

Those desirous of making representations before the Board at such sittings are requested to advise the Secretary on or before September 15, 1934, and anyone wishing to submit personal representations will please forward same to the undersigned.

FOR LUNCH

Local Items

STRAYED—To the premises of Fred Romeril, a ewe with a bell on. Owner may have same by paying for this ad. Call at Recorder office.

FOR SALE OR TRADE—Holstein milk cow, to freshen in December, good stock—See B. J. Coombs.

When struck by a falling tree while fighting forest fires in the Big Bend country at Cummings, B.C., Alberta, Allen Gear was instantly killed. He was in charge of a pump when the tragedy occurred.

FOR SALE—Registered Oxford Rams, of exceptionally fine breeding; these are priced right. Or will trade for feeder lambs, hogs, cattle or feed grain. Also quantity of pine poles for sale. Phone 149, C.O. Asplund, Raymond.

Local horseshoe enthusiasts had a tournament last Monday, and a lot of interest was manifested in the games played.

Solon Low was guest of honor at a Social last Friday evening sponsored by the first ward Sunday School officers, prior to his leaving for Stirling where he is now residing. A very pleasant time is reported.

Mr. and Mrs. Lowell Court are holidaying this week, spending part of their time with Lowell's folks in Diamond City, part with Mrs. Court's folks in Cardston, and the remainder in Waterton Park. They left Tuesday.

The Douglas system of Sacral Credit is the main issue in the elections now on in Australia. Many are asking if this will be the case in our next Dominion elections?

FORD DEALERS' RADIO PROGRAM

As announced over Columbia network on Waring program recently, a special Ford Dealers' radio program started Wednesday, September 5th, from 9:00 to 9:15 Eastern Standard Time, (7:00 to 7:15 our time), for the remainder of the baseball season, featuring Mickey Cochrane, Manager, Detroit Tigers, who will give baseball fans the inside story of the Penant Chase, high lights of teams involved and the players. Listen for this over your favorite station.

Hon. W. A. Black, a Privy Councillor, of Canada and former Minister of Railways, is dead in Halifax, Nova Scotia at the age of 87 years.

It looks natural to see the teachers and pupils on the streets again from 8:15 until five minutes to nine when they are practically all at school. The town hardly seems the same during the holidays.

U. G. G. ANNOUNCES DIVIDEND

Announcement is made by the United Grain Growers Ltd., of the payment of a dividend of four per cent, or one dollar per share on the paid up capital of United Grain Growers Ltd., for fiscal year ending July 31st. In announcing the dividend Mr. R. S. Law, president of the Company stated that payment is made from the earnings of the company after making provision for bond interest and full depreciation, and a satisfactory addition to surplus account. Attention was called to the fact that the shareholders have received, during the life of the Company, by way of dividends, an amount greatly in excess of the paid up capital of United Grain Growers Ltd. Cheques for the dividend just declared are to be mailed to shareholders on September 15th.

If you want to rent that house, place an ad, in the Recorder, and we will get you a renter.

NOTICE

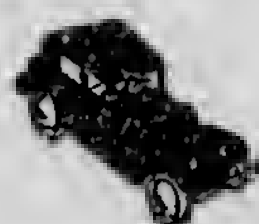

In the interests of better health and sanitation in our town, will all citizens in the Town of Raymond please see that all open toilets and drains are provided with proper facilities for taking care of refuse, such as new pits, etc.

An inspection will be made next week and offenders prosecuted.

E. S. HAWK,
Health Officer.

THE PROPER CARE OF YOUR AUTOMOBILE

Two Methods of Polishing

It has been told how the color and lustre of your automobile can be restored by the use of a properly formulated polish. There are two accepted methods of polishing, the one by using a combination cleaner and polish of the liquid type, and the other by using a cleaner and wax.

While the use of the liquid polish is less work, and will restore the lustre to your car in one operation, it doesn't last long and won't prevent further weathering.

The second method involves two operations, and while harder work, will preserve the finish for months. The traffic film must first be cleaned off with a mild abrasive polish or cleaner. When the finish is thoroughly dry and clean, the polishing wax is applied with a ball of soft cloth which has been damp-

ened and wrung "dry." The wax should be put on sparingly, rubbing it into small sections (not more than two or three square feet) at a time. Then the wax is rubbed up to a bright lustre with a clean dry cloth.

Wax, like window glass, has the ability to filter out the ultra-violet rays of the sun. When you wax your car, you apply a thin transparent film over the entire surface which, in addition to improving its appearance, protects the finish from weathering. It is easier, also, to keep the waxed surface clean, as dust and dirt can be wiped off much easier.

If given this attention a car will retain its good looks for years, and its finish will last a remarkably long time.
